PROFESSIONAL SUMMARY

Data Engineering fresher with a **Bachelor's Degree in Artificial Intelligence and Data Science** with hands-on experience building batch and real-time data pipelines using **Python, SQL, PySpark, Kafka, Airflow, and AWS.**

TECHNICAL SKILLS

Languages: Python, SQL
Data Engineering: PySpark, Spark SQL, Spark Structured Streaming, Apache Kafka, Apache Airflow
Databases: PostgreSQL, DuckDB, SQLAlchemy
Cloud: AWS S3, AWS Glue, Amazon Athena, IAM, boto3
Tools: Docker, Docker Compose, Git, Streamlit, pandas
Data Formats: JSON, JSONL, CSV, Parquet

EXPERIENCE

NovaProwl **Website**
Full-Stack Developer Intern *Remote | January 2026 – March 2026*

- Built features for an AI-based analytics platform using Next.js, React, TypeScript, Node.js, and Express, with support for CSV, TSV, Excel, and JSON datasets.
- Developed multi-dataset analysis and a data-cleaning workspace with **25+ operations**, including missing-value handling, deduplication, outlier removal, normalization, dataset merging, and CSV/XLSX export.

PROJECTS

Amazon Product Reviews Data Lake **GitHub**
AWS S3, AWS Glue, PySpark, Amazon Athena, Parquet

- Built a PySpark batch ETL pipeline for **2.22 million Amazon Appliances records**, including **2.12 million reviews** and **94,327 product metadata records**.
- Cleaned, deduplicated, and joined the datasets into **6 Snappy-compressed Parquet outputs** in Amazon S3, then catalogued and queried them using AWS Glue and Athena.

Wikimedia Live Edit Analytics Pipeline **GitHub**
Python, Kafka, PySpark, Spark Structured Streaming, DuckDB, Parquet

- Built a real-time pipeline that ingests Wikimedia events through Server-Sent Events, publishes them to a **3-partition Kafka topic**, and processes them using Spark Structured Streaming.
- Implemented **6 checkpointed streaming queries** with deduplication, a **10-minute watermark**, and event-time aggregations, storing results in Silver and Gold Parquet layers for DuckDB and Streamlit analytics.

GitHub Repository Analytics ETL Pipeline **GitHub**
Python, PostgreSQL, SQLAlchemy, Apache Airflow, Docker

- Built a Python ETL pipeline that collects daily metadata for **100 open-source GitHub repositories** through the GitHub REST API and stores historical snapshots in PostgreSQL.
- Orchestrated daily runs with Apache Airflow and containerized PostgreSQL, ETL, Airflow, and Streamlit services using Docker Compose.

EDUCATION

B.E. in Artificial Intelligence and Data Science **2023–2026**
Dr. D. Y. Patil Institute of Technology, Pimpri, Pune **CGPA: 8.44/10**
Savitribai Phule Pune University
