ANURAG GAIKWAD

Data & Backend Engineer

Nashik, Maharashtra

+91 78209 96083 | anuragworks09@gmail.com | Portfolio | LinkedIn | GitHub

TECHNICAL SKILLS

Languages & Databases: Python, SQL, TypeScript, PostgreSQL, Redis
Backend & Web: FastAPI, REST APIs, SQLAlchemy, Node.js, Express, Next.js, React, Tailwind CSS
Data Engineering: Apache Airflow, ETL Pipelines, Data Modeling, Web Scraping, HTTPX, Alembic, Ruff
Cloud & Tools: AWS (EC2, Lambda, S3, EventBridge, CloudWatch), Vercel, Linux, Git, Cron, systemd, Caddy
Testing & Security: pytest, Vitest, Playwright, Google OAuth/OIDC, JWT, MFA, CSRF, Rate Limiting

EXPERIENCE

IWM Quant
Data Engineer Intern *August 2026 – October 2026*

- Designed a **39-table PostgreSQL database** for a mutual fund investment app, covering user accounts, portfolio imports, financial goals, and fund analytics.
- Built reliable data import workflows that prevent duplicate records, maintain traceability of analytics data, and protect sensitive information such as PAN.
- Developed a Python ETL pipeline to collect daily mutual fund NAV data from AMFI, including **12+ years of historical data**. Automated ingestion using AWS Lambda and EventBridge Scheduler, with S3 storage and CloudWatch logging.
- Built Python scrapers to collect monthly portfolio disclosures and scheme documents from **50+ AMC websites**, then parsed and standardized the data for PostgreSQL.
- Deployed the scraping and processing pipelines on **AWS EC2**, using month-end cron jobs to automate collection, cleaning, and database loading.

NovaProwl
Full-Stack Developer Intern *January 2026 – March 2026*

- Built features for an AI-based analytics platform using Next.js, React, TypeScript, Node.js, and Express, with support for CSV, TSV, Excel, and JSON datasets.
- Developed multi-dataset analysis and a data-cleaning workspace with **25+ operations**, including missing-value handling, deduplication, outlier removal, normalization, dataset merging, and CSV/XLSX export.

PROJECTS

The Catalogue — Full-Stack Shopify Monitoring Platform Live | Github

- Built a full-stack application using React, TypeScript, and FastAPI that lets users monitor up to **10 Shopify brands**, browse product catalogues, track price changes, save products, and receive email alerts for size- and colour-specific restocks.
- Developed **30 REST API endpoints** using FastAPI and SQLAlchemy, backed by a **19-table PostgreSQL database**. Added product search, size and availability filters, dynamic price ranges, wishlists, and price history.
- Implemented user authentication with email verification, Google OAuth, and two-factor authentication. Secured API access using JWTs, rotating refresh tokens, HttpOnly cookies, CSRF protection, and rate limiting.
- Built a responsive frontend using React, TypeScript, and Tailwind CSS, with a centralized API client for request handling and session management. Deployed the frontend on Vercel and backend on AWS EC2 using Caddy with HTTPS.

Shopify Catalogue Ingestion and Change-Tracking Pipeline Github

- Built an automated Python pipeline that identifies and validates Shopify stores, extracts product data through paginated APIs, and supports catalogues of up to **25,000 products per store**.
- Developed data cleaning and transformation logic to standardize product details, sizes, colours, and prices across **25+ currencies**. Added validation checks to prevent incomplete or inconsistent data from entering PostgreSQL.
- Implemented incremental catalogue updates to detect price increases, drops, restocks, sold-out variants, and removed products. Stored historical changes in PostgreSQL to support price tracking and automated restock notifications.
- Automated daily catalogue refreshes using systemd timers, with request throttling, retries, and failure recovery. Added concurrency-safe email processing and automated PostgreSQL backups with **14-day retention**.

EDUCATION

B.E. in Artificial Intelligence and Data Science **2023–2026**
Dr. D. Y. Patil Institute of Technology, Pimpri, Pune **CGPA: 8.44/10**
Savitribai Phule Pune University
